# MyHealth.Us Launches Largest Patients Accessible Medical Records Access Point with 1up.Health for Over 1000 Hospitals and 50% of US Market

*MyHealth.Us' 24/7 emergency care and health tracking system including access to affordable innovative healthcare services now offers users more hospital and doctor records access than AppleHealth or any other provider. All records can be downloaded with one-click from a growing list of participating hospitals so consumers direct their care for better, faster results with fewer errors reducing costs for everyone.*

**NEW YORK ([PRWEB](#)) May 15, 2018**

MyHealth.Us is the first public partner of 1upHealth's FHIR-based system providing MyHealth.Us users access to their records at over 126 of the largest hospital data systems in US. Large hospital data systems Epic and Cerner are included, along with access to records with Fitbit and other popular apps. MyHealth.Us already offers consumers access to their records at over 560,000 acute care physicians via DirectTrust.

**Ricky Sahu, CEO of 1upHealth, noted** *"This level of connectivity has never been possible before. MyHealth.Us breaks through the glass ceiling giving users their data to share and get care anywhere. It is truly life saving in emergency situations, and for predictive and preventive care."*

**CJ Wilson, CEO of MyHealth.Us, added** *"1upHealth has delivered the largest jump in interoperability between hospitals, and with MyHealth is enabling patient records directly to consumers. We are pleased to launch their service on our platform to provide the very best consumer-driven healthcare possible."*

**MYHEALTH.US We Save Lives!®**

**❝** *Ricky Sahu, CEO of 1upHealth, noted "This level of connectivity has never been possible before. MyHealth.Us breaks through the glass ceiling giving users their data to share and get care anywhere. It is truly life saving in emergency situations, and for predictive and preventive care."* **❞**

**Rod Maxson, CEO of MPower Benefits LLC, noted that** *"We have provided MyHealth.Us emergency and consumer care services to all insured members of our programs since 2016. The savings for us and our clients is notable. This growth in access should improve that return."*

## About MyHealth.Us

Established in 2013, MyHealth.Us is a healthcare services technology platform created by MyInfo LLC. MyHealth.Us provides members, employers, labor unions, insurance companies and communities with unique LifeCodes® products with emergency profile information and 24/7 emergency assistance, secure collection and transfer of medical records, confidential tracking of health conditions, and recommendations and access to more affordable, innovative consumer-facing healthcare solutions. Their motto is "We Save Lives!". Outcomes are earlier, better and faster treatment, fewer medical errors and more innovative cost-effective care.
