

## Local 46 NYC Iron Workers Renew MyHealth.us 24/7 Emergency Medical Assistance Services for All Members

*Local 46 Iron Workers in 2017 was the first Union to give MyHealth's patent-pending healthcare platform to all members to provide first responders and care providers immediate access to life-saving healthdata along with giving members access to more cost-effective consumer-facing innovative diagnostics and treatments for faster better care.*

NEW YORK (PRWEB) JULY 20, 2018

Local 46 Iron Workers confirmed renewal and continuation of providing all members with custom MyHealth.us LifeCodes on Local 46 helmet labels, membership cards, metal shoetags, wristbands and charms. Using MyHealth's online platform, workers, their families, and first responders are empowered with more and better medical data, enabling them to reduce medical errors, improve treatment outcomes, and save lives. In the event of an accident, emergency personnel scan the helmet label or other LifeCodes and receive the information needed to provide the injured person with safe effective care. Regular emails, texts and reminders encourage consistent tracking of fitness and early treatment of any health issues.

MyHealth.us' union, corporate, insurance and community members benefit from ease of access to their medical records at over 170 hospital systems and over 560,000 doctors via MyHealth.us' platform. MyHealth.us securely maintains and exchanges medical, tracking and sensor data and provides advance patient engagement and AI for predictive and prevent care nationwide.

**Terry Moore, Business Manager of Local 46** says *"Our members work hard and get the job done right. We work hard to ensure their safety and health wherever they are. MyHealth.us means better emergency care and more access to services. We could not be happier to provide this benefit to our members"*.

**CJ Wilson, CEO of MyHealth.us**, added *"Our mission is simple; to get people well fast and keep them healthy affordably. We thank Local 46 for choosing MyHealth.us to reinvent emergency medical care."*

### About MyHealth.us

Established in 2013, MyHealth.us is a healthcare services technology platform created by MyInfo LLC. MyHealth.us provides members, employers, labor unions, insurance companies and communities with unique LifeCodes® products with emergency profile information and 24/7 emergency assistance, secure collection and transfer of medical records, confidential tracking of health conditions, and recommendations and access to more affordable, innovative consumer-facing healthcare solutions. We Save Lives!. Outcomes are earlier, better and faster treatment, fewer medical claims and errors, and more innovative cost-effective care.
